## TIPS FOR PRINTING

**For best results, don't print all of these pages at once! You should save this file to your computer so you can revisit at your convenience to print only the pages you need.**

- ✓ The latest version of Adobe Acrobat is recommended. You may have more than one version on your computer. Uninstall the old version(s) if you are having problems.
- ✓ Adobe Acrobat Reader may have the option "Fit to Page" checked by default. This may or may not result in a better printout. Experiment with this to get the best results.
- ✓ If you have problems printing, try checking the option "Print as Image."
- ✓ If the pages are printing without the images, your computer may be low on memory or resources. This is a common problem associated with Adobe Acrobat Reader. Restart your computer and try printing again. Also try sending fewer pages to the printer at a time. If you don't have the most current version of Acrobat, you may also experience problems.

<b>Mini-Book: My Pumpkin</b> .....	35
Students complete this book as they measure, weigh, and examine their pumpkins.	
<b>Other Supporting Pages</b>	
Blank pumpkin outlines.....	39
<b>License Agreement</b> .....	42

## How to Assemble Student Mini-Books:

To produce books for several students, it is recommended that you make double-sided photocopies of the pages after printing. To assemble, just cut along the line on each page, order the pages, and staple. I have found it works best to use a paper cutter to cut many pages at once, and pass those out to students. (I can usually get the paper cutting done while I'm waiting for the other copies to run—quick and easy!) Most kids will be able to order the pages with minimal assistance. Double-sided photocopies require less paper per book and less cutting! You can, however, photocopy the pages onto separate pieces of paper, if you prefer.
