TIPS FOR PRINTING

* Adobe Acrobat Reader will often have the option "Fit to Page" checked by default. Unchecking this will usually result in a better printout. You may want to experiment with this.

* If the pages are printing without the images, your computer is probably low on memory or resources. This is a common problem associated with Adobe Acrobat Reader. Restart your computer and try printing again. Also try sending fewer pages to the printer at a time.

HOW TO ASSEMBLE STUDENT MINI-BOOKS

To produce books for several students, it is recommended that you make double-sided photocopies of the pages after printing. To assemble, students just cut along the line on each page, order the pages, and staple. Double-sided photocopies require less paper per book and less cutting! You can, however, photocopy the pages onto separate pieces of paper, if you prefer.

If you want to create a sturdier cover, you can use a sheet of construction paper. Just staple halves of the construction paper before and after the photocopied pages of the book. You can then write the title of the book on the construction paper cover. Page 1 of the mini-book will serve as the title page.
